Compact Tractor Loader Mirror Arms

Fits John Deere Loaders: D120, H120, 120E, 120R
- Mirror arms are designed to offset mirror from the frame of the loader to help with vision around rear lights. Offset keeps the mirror head (Part #760814) inside the outer line of the bucket, too. Mirror arms are also bent back and away to easily grab the hand grip (Part #504860).
- Bracket is sold less hardware. Hardware with hand grip kits (Part #504860 & #504865) are longer to allow for addition of the mirror arms.

Flow Control Valves

These pressure-compensated variable flow control valves maintain constant output flow despite pressure changes on the controlled flow line. Rotating the volume lever adjusts the orifice size from completely closed to wide open, thus varying the pressure drop across the spring-loaded metering spool.

HYPRO ROLLER PUMPS

Hypro Roller Pumps

Hypro roller pumps are designed for agricultural and industrial spraying and transfer of a variety of fluids. These include insecticides, herbicides, emulsives, aromatic solvents, liquid fertilizers and many other liquids. Construction features include a cast-iron, Ni-Resist or the new SilverCastTM body and rotor, 416 stainless steel shaft, sealed factory-lubricated ball bearings, cartridge-type lip seals of viton, buna-n or leather, and versatile super rollers. (Super Rollers feature the life of polypropylene and the chemical resistance of nylon.) Rotation for all models is counterclockwise for easy tractor PTO drive, except models 4001 and 4101 which are clockwise. Pumps are available in reverse rotation.

Hydraulic Motor Driven

These models are cast iron straight centrifugal frame mounted pumps driven by a close coupled hydraulic motor. The hydraulic motor has two built in check valves to prevent seal damage due to impeller coasting and reverse rotation. Each motor also has an integral needle valve to by-pass excess hydraulic fluid on open center systems. Consult the Tractor Hydraulic System Pump Selection Guide.

RAVEN PRODUCTS

NEW! Vortex Anhydrous Cooler

- Anhydrous cooler only. Used in vortex and accuflow hp plus applications. Flanged inlet & outlet.

Part No. 20630173987 **$2,719.99**

Raven Vortex SST Reverse Manifold Anhydrous Cooler

- Stainless Steel Single Inlet Cooler with dual 2" inlet reverse manifold, Dual-Valve Control (1-1/2" On/Off & Control Valves, Victaulic Flowmeter Installed

Part No. 1170171720 **$11,099.99**

Regulating Control Valve

- 1 ½" flowmeter (1 ½" fpt), stainless steel, 1-60 gpm. Replaces Part #0630171666.

Part No. 20630173867 **$1,189.99**

1-½˝Victaulic Flowmeter

- 1-½˝ flowmeter, stainless steel. Not threaded. 1-60 Gpm. Can be used in standard anhydrous applications (accuflow).

Part No. 20630173618 **$1,168.79**

1˝Anhydrous Control Valve Assembly

- For NH3 Applications. 1˝ valve (1˝ FPT). Acts as a regulating valve and an on/off valve. Replaces Part #063-0172-979.

Part No. 20630173877 **$841.79**

1" Flow Control Valve Assembly

- Complete assembly w/ 1-1/4" to 1" pipe adapters. For use as a control valve only

Part No. 1170171706 **$649.99**

Fast Valve, Motor Only

- Motor only for 1˝ & 1-¼˝. Fast valves only (anhydrous).

Part No. 20630172982 **$1,249.99**

450 Console

- Rate controller. Up to 5-section control.

Part No. 20630171220 **$2,449.99**

1˝On/Off Valve Assembly

- For anhydrous applications. 1˝ valve, on/off only (1˝ FPT). Stainless steel. Replaces Part #063-0172-978

Part No. 20630173876 **$836.19**

1˝On/Off Valve Assembly

- Comes with adapter fittings to reduce from standard 1-1/4" plumbing to 1". 1" stainless steel valve. Replaces Raven #0630173203. Not for use as a section shut off valve.

Part No. 1170171705 **$1,009.19**

1-½˝On/Off Valve Assembly

- For anhydrous application. 1-½˝ valve (1-½˝ FPT). Acts as an on/off valve only. Used with vortex and accuflow hp plus systems.

Part No. 20630173668 **$1,488.09**

Three Boom Section Control Assembly

- Replaces Raven Part #0630171928. On/Off Valve, Motor & Valve Assembly. Used for Boom Section Control

Part No. 20630171928 **$1,049.99**

Five Boom Section Control Assembly

- Replaces Raven Part #0630172039. On/Off Valve, Motor & Valve Assembly. Used for Boom Section Control

Part No. 20630172039 **$1,749.99**

1-½″ Control Valve

- For anhydrous application, 1-½″ valve (1-½″ fpt). Acts as a regulating valve only. Used with vortex and accuflow hp plus systems.

Part No. 20630173667 **$1,429.99**

On/Off, Motor Only

- Motor only. For 1″ & 1-¼″ on/off valves only (anhydrous).

Part No. 20630173207 **$668.29**

Regulating Control Valve Motor

- Motor only, replacement motor for 0630172977 & 0630173202 valve assemblies. Replaces Part #0630172980.

Part No. 20630172980 **$527.49**

1-½″ On/Off Valve Motor

- Motor only, replacement motor for 0630173668 valve assembly.

Part No. 20630173665 **$695.99**

1-½″ Control Valve Motor

- Motor only, replacement motor for 0630173667 valve assembly.

Part No. 20630173664 **$859.99**

Poly ManiFold Flowmeter

- Not for use in anhydrous applications. Poly Flowmeter. 1-60 Gpm. M200 flanged only.

Part No. 20630171985 **$698.99**

Vortex Adapter Kit

- Includes: 2 HP Plus mounting brackets, 1 grooved EPDM coupling, 1 gruvlok fitting, 1 reducer bushing fitting, 2 u-bolts, 4 flanged lock nuts.

Part No. 1170171713 **$548.99**

Single ManiFold Valve

- On/Off valve, motor and valve assy., Used for boom section control.

Part No. 20630171926 **$369.99**

1″ Poly Control Valve

- 1″ flanged valve, butterfly style, rate control only, liquid product only. Not for use with anhydrous.

Part No. 20630172125 **$509.99**

Poly Regulating Control Valve

- Inlet/Outlet Fittings - 1-1/2" female pipe thread and 2" standard port flange (200 Series). Replaces Part #0630171894.

Part No. 20630171894 **$519.999**

Flowmeter Repair Kit

- Kit Includes: 1 hub/bearing, 1 rotor, 1 downstream bearing, 2 retaining rings, 1 turbine stud. Replaces Part #1170171590.

Part No. 1170171590 **$355.59**

Accuflow Repair Kit

- Repair kit for Raven Accuflow Coolers. Kit includes 2 o-rings and 2 gaskets. Used with 1-¼″ & 1-½″ coolers.

Part No. 1170171121 **$109.99**

Vortex Cooler Repair Kit

- Repair kit for vortex and hp plus coolers. Includes: 3 sets of o-rings and hardware.

Part No. 1170171591 **$86.99**

1-½" In-Line Mixer

- 1-½″ mixer for n-serve/anhydrous applications, 1-½″ female threads on both ends, ½″ side port for injection n-serve, stainless steel.

Part No. 20630173770 **$888.89**

Flowmeter Sensor

- Sensor w/ pigtail and nut only. Used in 0630171666, 0630173618 & 0630171793 flowmeters.

Part No. 20630171669 **$240.49**

12′ On/Off Extension Cable

- Used to extend harness to on/off valves on anhydrous toolbars.

Part No. 1150171833 **$204.99**

10' Console Harness

- For SCS440 & SCS450 monitors. Can use on 3-section & 6-section cabling.

Part No. 1150171085 **$476.09**

24' Main Harness Extension

- Up to 3 sections. Mainly used with SCS440 & SCS450 monitors.

Part No. 1150159857 **$455.99**

3-Section Implement Harness

- Up to 3 on/off valves. Includes plugs for flowmeter. Control valve, on/off valves.

Part No. 1150171836 **$1,031.29**

Implement Harness

- 12′ single section product cable (1 on/off valve).

Part No. 1150171800 **$499.99**

½″ Check Valve

- ½″ MPT x ½″ FPT. Used in conjuction with 1-½″ in-line mixer for anhydrous.

Part No. 3330011102 **$149.99**

6 Section Implement Harness

- Includes plugs for flowmeter, control valve, and boom section valves (weatherpack connectors). Up to 6 boom section valves.

Part No. 1150171129 **$503.49**

24′ On/Off Extension Cable

- Used to extend harness to on/off valves on anhydrous toolbars.

Part No. 1150171834 **$209.89**

12' Extension Harness

- 12′ flow extension cable.

Part No. 1150171055 **$479.99**

12′ Speed Extension Harness

- Extends harness to radar. Wheel speed sensor. Some magnetically mounted speed sensors (not GPS).

Part No. 1150159032 **$148.59**

12' Main Harness Extension

- Up to 3 Sections. Mainly used with SCS440 and SCS450 monitors.

Part No. 1150159856 **$545.39**

Pressure Transducer

- Used in liquid and anhydrous applications (early vortex/accuflow hp plus models).

Part No. 4220000090 **$509.49**

Strainer Magnet

- Used in all anhydrous strainer applications. Normally 2 per strainer (1″, 1-¼″ & 1-½″). 4 used within 2″ strainers.

Part No. 4180000001 **$9.29**

BOOM COMPONENTS

Remote Control Electric Regulating Valve

The 244-¾ butterfly valve provides remote pressure control. Features two-wire lead for use in 12VDC system, reduced pressure loss (1 psi for 20 gpm flow), and maximum operating pressure of 100 psi.¾″ NPT (F) connections. Low current draw (0.15 amp). With electrical connectors for simple installation with Spraying Systems Co. sprayer controls.

Part No.
330109 **$219.99**

Motorized Electric Ball Valves Compatible w/ All Sprayer Controls

The TeeJet Electric Ball Valve features wire lead for use with 12VDC systems. 1″ NPT (F) connections and operating pressure of 300 P.S.I.

Part No.	Item	Price
330107	AA344BEC-24-C, 2-Way	$275.99
330118	AA344AEC-34-C, 3-Way	$325.99

TeeJet DirectoValve Control Valves

TeeJet 12 volt D.C. DirectoValve for remote electric on-off control of boom or nozzle lines. This valve is direct acting with large internal flow passages making it suitable for wettable powder applications. The valve has dual inlet ports that enable it to be joined in compact two or three unit assemblies.

- For Pressures Up To 65 PSI (4.5 Bar)
- 8 GPM (30 l/Min) With A 5 PSI (0.34 Bar) Pressure Drop
- 2.5 Amp Current Draw
- Encapsulated 12 VDC Coil Can Be Easily Changed Without Removing Valve From Line
- Polypropylene Body For Chemical Resistance
- Internal Metal Parts Are Stainless Steel
- Chemical Resistant EPDM Diaphragms & Seat Washers

Part No.	Description	Price
330051	144A Solenoid One Valve Unit (¾″ In ½″ Out)	$129.99

Wilger ManiFold Flow Indicator

Available In ⅜″, ½″ Or ¾″ – Specify Size & Straight Or Elbow For Inlet/Outlet When Ordering.

- Multiple flow indicators can be connected together so that one feed hose can supply multiple outlet hoses.
- Metering orifices can be utilized to control flow.
- Up to 3 nozzles or openers can be monitored by a single flow indicator.
- 100 PSI maximum operating pressure.
- UV protected material stays clear.
- With in/out fittings

- 3-Switch Control Box, Wiring, Regulator, 3 Solenoids

Part No. 330114 — **$819.99**

Raven Sprayer Console Control Kit

- Kit Includes: 450 Console (0630171220), 1-1/2" Control Valve (0630171894), 1-1/2" Poly Flowmeter (1-60 gpm) (0630171985), 10' Console Harness (1150171085), 12' Implement Flow Cable (1150171129)
- Shut off up to 6 sections
- Standard with weatherpack connections for boom valves
- Does not include speed sensor or boom section valves

Part No. 330500 — **$4,652.89**

450B Directo Valve ManiFold

- Maximum Pressure 150 PSI (10 Bar)
- Easy Mounting With Built-In Brackets
- Based On Proven Design Of AA344 Ball Valves
- 12 VDC Operation
- Nylon Stem & Polypropylene Ball Available As Standard
- Flow Rate 31 GPM @ 5 PSI Pressure Drop (Flow Rates May Vary Based On Number Of Valves & Inlet Size)
- ¾ Second Response Time From Fully Open To Fully Closed
- 1-½″ NPT Inlet
- 1″ NPT Outlet

2 Valves w/ ManiFold
Part No. 333210 — **$649.99**

3 Valves w/ ManiFold
Part No. 333212 — **$909.99**

4 Valves w/ ManiFold
Part No. 333214 — **$1,159.99**

440B ManiFold Directo Valve

- 1″ NPT ManiFold Inlet
- Quick, Simple Plumbing Of Up To Five Electric Ball Valves
- Easy Mounting With Built-In Brackets
- Based On Proven Design Of AA344 Ball Valves
- 12 VDC Operation
- Maximum Pressure Rating: 300 PSI (20 Bar)
- Nylon Stem & Polypropylene Ball
- Flow Rate 26 GPM @ 5 PSI Pressure Drop (Flow Rates May Vary Based On Number Of Valves & Inlet Size)

1 Valve
Part No. 333200 — **$339.99**

2 Valves w/ ManiFold
Part No. 333201 — **$703.99**

3 Valves w/ ManiFold
Part No. 333202 — **$949.99**

4 Valves w/ ManiFold
Part No. 333203 — **$1,299.99**

Stay Foam Concentrate 120 To 1

- Recommended For Foam Marker System
- 1 Gallon Container
- Can Be Used With All Types Of Foam Markers

Part No. 339220 — **$90.99**

128 Oz. Calibration Jug

- Graduated In Ounces & Metric

Part No. 400501 — **$21.99**

QJ363C Series Multiple Nozzle Body For Dry Booms

- 3 spray positions for easy change of spray tips.
- Positive shut-off between each spray position.
- Maximum operating pressure of 300 psi.
- Standard EPDM diaphragm.
- Includes ChemSaver® diaphragm check valve for drip-free shutoff.

TURBO TEEJET SPRAY TIPS

Features:

- Tapered edge wide angle flat spray pattern for uniform coverage in broadcast spraying.
- Large, rounded internal passage to minimize clogging.
- Excellent resistance to corrosive solutions.
- Superior wear characteristics.
- Caps match tip color.
- Larger droplets for less drift –15-90 PSI (1-6 bar).
- Automatic spray alignment with Quick TeeJet cap and gasket.
- Adjust spray height in the field to overlap approximately 30% of each edge of pattern.

Suggested Spray Height	
Spray Height 20″ Spacing	**Spray Height 30″ Spacing**
15 – 18″	20 – 22″

Tips $6.08ea. **Caps $1.12ea.**

AIR INDUCTION TURBO TWINJET

Features:

- Air induction with dual 110° flat fan patterns
- 60° between leading and trailing spray patterns
- Good coverage with increased canopy penetration and best drift control
- Best suited for postemergence applications
- Excellent drift control with coarse to very coarse droplets
- Available in nine VisiFlo® color coded capacities (02 through 15)—color represents total flow
- Pressure ranges from 20–90 PSI (1.5–6 bar)
- Automatic spray alignment when used with 25598-*-NYR (02–06) or 98579-1-NYR (08–15) Quick TeeJet® cap and gasket.

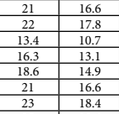
TwinJet VisiFlo Twin Flat Spray Tips



Features:
- Penetrates crop residue or dense foliage.
- Smaller droplets for thorough coverage.
- Better spray distribution along boom than with hollow cone nozzles.
- Available in brass and stainless steel in 65°, 80° and 110° spray angles.
- Also available in TwinJet 40° and 80° twin even flat spray patterns in brass and stainless steel.

Typical Applications:
- EXCELLENT: Post-Emerge Contact Herbicides – used at higher pressures (30-60 psi) to produce small droplets for better coverage. The two flat sprays provide a dual "angle of attack" for better spray penetration. TwinJet tips produce smaller droplets than equal size single flat spray tips. The 110° tips produce smaller droplets than 80° tips.
- GOOD: Pre-Emerge Herbicides – for application of surface applied herbicides in minimum tillage or heavy crop residues. Used at medium pressures (30-35 psi).

XRC TEEJET SPRAY TIPS

XRC Extended Range Flat Spray Tips

Features:
- Excellent spray distribution over a wide range of pressures—15–60 PSI (1–4 bar).
- Ideal for rigs equipped with sprayer controllers.
- Reduces drift at lower pressures, better coverage at higher pressures.
- 80° available in stainless steel (015, 02, 03–06 capacities) & ceramic (02, 03–08 capacities).
- 110° available in stainless steel (025–05 capacities), ceramic (02–08 capacities) & polymer (025–20 capacities).
- XR TeeJet tip molded into Quick TeeJet® cap provides automatic spray alignment.
- Includes tightly fitting washer that stays put & assures a good seal.

Tips $7.41ea.

XR TEEJET SPRAY TIPS

Features:

- Excellent spray distribution over a wide range of pressures -15-60 PSI (1-4 bar).
- Ideal for rigs equipped with sprayer controllers.
- Reduces drift at lower pressures, better coverage at higher pressures.
- Stainless steel insert.

- Available in ceramic sizes 03 thru 08.
- Automatic spray alignment with 25616-*-NYR Quick TeeJet cap and gasket.
- Automatic spray alignment for sizes 10 and 15 with 25610-*-NYR quick TeeJet cap and gasket.
- Adjust spray height in the field to overlap approximately 30% of each edge of pattern.

Turbo Teejet Air Induction Flat Spray Tips

Features:

- Approved for Dicamba & Roundup Ready Xtend & XtendiMax.
- 110° wide angle spray angle.
- Tapered flat spray pattern.
- Operating Range: 15-100 PSI.
- Polymer construction for chemical and wear resistance.
- Visiflo-color coded for easy identification.
- Pre-orifice is removable.
- Perfect for use with automatic sprayer controllers.
- Recommended to space the nozzles 20" apart.

Air Induction XR Flat Spray Tips

Features:

- 110° wide, tapered flat spray angle with air induction technology offers better drift management.
- Made of a two-piece UHMWPE polymer construction with VisiFlo® color-coding. UHMWPE provides excellent chemical resistance, including acids, as well as exceptional wear life.
- Compact size to prevent tip damage.
- Depending on the chemical, produces large air-filled drops through a Venturi air aspirator.
- Available in seven tip capacities with a wide operating pressure range: 15–90 PSI (1–6 bar).
- Removable pre-orifice.

SJ3 Fertilizer Nozzles

Features:

- VisiFlo® color-coding system.
- Three solid streams of equal velocity and capacity.
- Removable metering orifice for easy cleaning.
- Ten sizes for a wide range of application rates.
- Equally spaced distribution at 209 (50 cm) height.
- Use with Quick TeeJet® cap 25598-*-NYR.
- All acetal construction for excellent chemical resistance.
- Recommended operating pressure: 20–60 PSI (1.5–4 bar).
- Solid stream pattern minimizes leaf burn and virtually eliminates drift.

Chafer Multi Rate Stream Spraying Bars

Feature a 6 position sliding orifice bar, which allow sprayers to apply a wide range of different rates (for example at 10 mph they will apply between 11 and 89 US gallons per acre of liquid nitrogen, when using all 6 of the adjustable settings). These stream bars come with a rubber washer and a tip strainer (recommended even if you have in-line strainers).

15" Spraying Bar **330415** **$28.59**

HYPRO PULSEGUARD

The Hypro PulseGuard nozzles are a PWM compatible nozzle ideal for the application of broad-spectrum herbicides and crop protection chemistry. Providing a droplet spectrum of Extra-Coarse, Very Coarse and Coarse the Hypro PulseGuard nozzles provide a flexible droplet size spectrum that can be effectively used for the application of wide-ranging crop protection chemistry.

PB Penetrating Catalyst

PB quickly breaks loose surface tension rust and corrosion by creeping up, around and into hard-to-reach cavities. It's ideal for brake, exhaust and suspension system jobs. Plus, lubricating film remains on parts to help prevent further rusting.

These heavy duty disc bearings are equipped with rugged triple lip seals bonded to heavy gauge steel trash guard shields. These bearings are designed for applications which are exposed to severe contamination such as: Disk Harrow, Disk Hillers and Trenching Machinery. The shields are crimped into outer ring groove surface which securely holds seals in place.

PRECISION CORN METER | Precision Planting

SkipStop™ eliminates seed bounce in the belt housing. SkipStop is a replacement belt housing cover that has a patented cushion system that eliminates seed bounce in the belt housing of finger pickup meters. Seeds hit this cushion and drop directly onto the seed belt for delivery to the seed tube.

Population Max is a specialized poly backing plate that replaces the metal plate in your current meter. Population Max uses a special Kevlar impregnated poly to produce a flatter, more consistent platform for finger sets.

Precision Brush lets you quickly and easily change the characteristics of your meter to match your seeds.

SureFire Seed Belt is a major improvement over the stock seed belt and offers consistent seed hand off and seed tube ride by allowing the belts cupped access to cradle the seed for delivery preventing spacing errors in the field.

Precision Finger sets and calibrate the meter to match your seed size and shape. Chrome fingers, fine-tuned tension springs, custom cams and covers all contribute to a long-lasting meter.

Seed Catcher for Central Fill Planters

- Fits John Deere, Case-IH, White & Kinze "Central Fill" Planters.
- Will not work on DB Series Planters. DB Planters will not allow access to the underside of the hopper for the seed catcher.
- Simply hooks up under hopper and is removed after each use.
- Easily attaches to center fill planters for clean out.
- Saves time switching and spilling/wasting seed.
- Works for both corn and soybeans.
- Costs less than 1 bag of corn and can be used year after year.
- Internal hopper cleans the seed so it can be reused.

Drag Chain

- Helps The Closing Wheels In Wet Conditions

Part No.
6200-108 **$45.99**

360 Wave Enhanced Seed-Trench Closing

- Creates a "wave" of moist soil that rolls over the seed to simplify the job of the closing wheels. The blade pivots, self-aligning itself in the trench. Meaning it follows the trench on curves. A stop prevents the blade from pivoting over the seed trench on tight left turns. See website for more information.
- Fits John Deere Planters: 1700, 1705, 1710, 1715, 1720, 1725, 1725 NT, 1725C, 1730, 1735, 1750, 1755, 1760, 1760 NT, 1765, 1765 NT, 1770, 1770 NT, 1775, 1775 NT, 1780, 1785, 1790, 1795, DB120, DB37, DB37C, DB41, DB44, DB55, DB55C, DB58, DB60, DB60T, DB62, DB66, DB74, DB80, DB83, DB88, DB90, DR12, DR16, DR18, DR24, DR8T

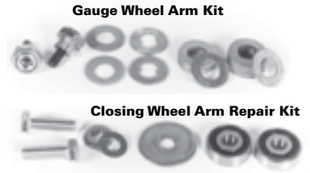
Gauge Wheel Arm & Closing Wheel Arm Kits



The GWARK is different from all other kits on the market, it supports the offset load in a different way and actually solves the problem. The RKP design utilizes a disc spring to pre-load the outer end of the hub of the arm with enough spring pressure that the arm cannot lean but can pivot freely. The pressure remains distributed almost uniformly around the circle of contact which is a large area. The result is that wear is practically eliminated.

Gauge Wheel Arm Repair Kit

The GWARK is different from all other kits on the market, because it supports the offset load in a different way and actually solves the problem. The RKP design utilizes a disc spring to pre-load the outer end of the hub of the arm with enough spring pressure that the arm cannot lean but can pivot freely. The pressure remains distributed almost uniformly around the circle of contact which is a large area. The result is that wear is practically eliminated.

Sensors For: Cyclometer I, II & III, Performance Center, Seed Flow II, Early Riser Monitors

The SENSOR-1 Air Planter Population or Seed Flow Sensors are field tested and constructed of solid-state infrared electronics encased in a one-piece, injection-molded plastic housing and sealed with a special epoxy. This sensor is used on most air planters for seed flow or population count. The Air Planter Sensor is designed for single seed drop for population count or seed flow. This type of sensor is not accurate with multiple seed dropping used on drills.

The connector for the Air Planter Sensor is available in two types of configurations: 3 individual AMP or Weather-Pack Connector. Sensors have 33″ leads.

- **Fits:** 400, 500, 800, 900, 950 Cyclo Planters

Sensor For: Case-IH 1200 Planter With Early Riser Monitor System

The SENSOR-1 1200 Series Sensor for Case-IH Early Riser Planter are field tested and constructed of solid-state infrared electronics encased in a one-piece, injection molded plastic housing. This sensor is used on most 1200 Planters for seed flow or population count. The 1200 Planter sensor is designed for single or multiple seed drop for population count or seed flow. The connector for the 1200 series sensor is available in a weather-pack style only. Will not work with ASM monitoring systems.

111415	Planter Population Sensor w/ WP	$104.99

Sensors: Fit John Deere, Case-IH, Crust Buster, Great Plains, Tye, Hiniker, Krause, Marliss, Sunflower, United Farm Tools

The SENSOR-1 Grain Drill Population Sensors have three infrared lights to provide the capability of monitoring high-rate population when drilling soybeans, or other types of seeds (this sensor can count wheat, but not at 100% accuracy). These drill sensors assure the best possible seed population. The unique design is made to all Sensor-1 quality Standards. Grain Drill Population Sensors are field tested and constructed of solid-state electronics encased in an injection-molded plastic housing and protected by a special epoxy. Special configurations are available for different needs. This Grain Drill Sensor is only available with Weather-Pack connector. Sensors have 33″ leads.

Posifeed Rollers

This revolutionary feeder chain drum is designed to improve feeding, reduce loses and increase speed! In side-by-side testing with standard drums, the Posifeed Roller consistently delivered superior results. This innovative new drum was developed by a farmer with extensive research on a variety of combines. Unique paddle-style drum provides more aggressive and smoother feeding in light or heavy crops, and can increase harvesting speed.

Rotor Transition Cone Vane Kits

Standard ⅛″ vanes for rotor transition cones. Includes mounting hardware. Longer wearing 3⁄16″ stainless steel vanes – installed with t-bolts. Ideal for harvesting beans and other crops in tough conditions. **A&I rotor vane kits use ⅜″ hardware throughout. If installing on a Loewen/A&I rotor cone, no modifications will be needed. If installing on a OEM rotor cone, 5⁄16″ holes will need to be drilled out to ⅜″.**

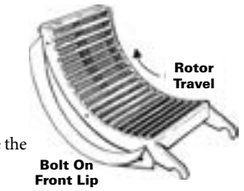
Concaves



Grade C1045 high carbon steel, and have added strength at stress points. All Rotary concaves feature milled, square-edge cross bars which conform to the drum diameter for a smooth and even threshing surface, and C1045 ¼″ wires. Rotary concaves feature ⅜″ x 2″ high carbon C1045 steel cross bars and ⅜″ side plates, making this concave much heavier than original and virtually impossible to bend or bow. Convert any middle or rear unit into a front concave with this feature. Narrow space concaves are low wire, and Wide space concaves are high wire. All 1600, 2100 & 2300 Series concaves have the extension built into the concave as one piece, which is stronger than the separate concave and extension.

THRESHING: FITS CASE-IH

Helical Concaves

Feature angled cross bars for more aggressive threshing. This unique concave is designed to prevent whitecaps or unthreshed grain in hard to thresh crops. Material enters the rotor and strikes the cross bars at a right-angle, which hits the heads hard and breaks up any straw that could interfere with the separation of the grain. For tough conditions, it is recommended to install a Helical Concave in both the front and middle positions.

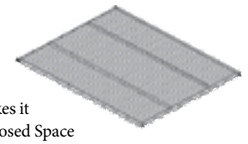
SEPARATION: FITS CASE-IH

Adjustable Chaffers & Sieves



The Short Finger is designed for cereal and fine seed crops and the long finger is used in large seed crops such as corn and beans. Chaffers and Sieves feature nylon adjustment mechanisms and cushions in each wire hole to improve adjustments and to reduce friction, wear and breakage. A spring loaded indexed lever allows smooth adjustment, and makes it easy to return to the same settings. Individual replacement louvres make repairs easy. Wire spacing is available in 1-⅛"' Closed Space and 1-⅝" Wide Space.

Snout Saver Skids: Fit Case-IH

The bubble design for hollow points is used to lift the point off the ground and create a larger surface area for ground contact. Both features keep the snout from digging into the dirt, wrinkling the snout, which results in costly replacement or repair.

PLATFORM PARTS: FIT CASE-IH

Snout Saver Skids: Fit Case-IH

The bubble design for hollow points is used to lift the point off the ground and create a larger surface area for ground contact. Both features keep the snout from digging into the dirt, wrinkling the snout, which results in costly replacement or repair.

Walker Concaves

Concaves are made with grade C1045 high carbon steel, and have added strength at stress points. All concaves feature milled, square-edge cross bars for a smooth and even threshing surface, and C1045 ¼″ wires, holes are drilled to provide a tight wire fit, which prevents spearing and trapping of straw.

STS & S Threshing Elements & Tines

Made with forged steel, new sets elements and tines provide less breakage and longer wear than OEM. Threshing elements now sold in two piece design. This provides a more economical replacement solution compared to OEM elements. Replace thresher bars easily with two bolts. Bases and bars sold separately. **All Bars Sold In Sets Of 3 With Hardware.**

STS Helical Front Unit Concaves

Features angled cross bars for more aggressive threshing. This unique concave is designed to prevent whiteheads or unthreshed grain in hard to thresh crops such as wheat. Material enters the rotor and strikes the cross bars at a right angle which hits the heads hard and breaks up any straw that could interfere with the separation of the grain.

Kondex KX7 Concave Threshstart

- KX7 concaves feature a helical, half-width design that meets the crop head-on for more immediate threshing that increases the capacity of your combine. This allows you to raise your concave clearance, reduce wear to your rotor and achieve more flexibility to fine-tune settings. KX7 also offers more grain-on-grain threshing as a result of increased airflow disruption.
- 10-15% more productivity
- 15-20% greater capacity

Unload Auger Shut-Off Kits

The Lankota unloading auger clutch system is an electromagnetic clutch system, allowing the combine operator to empty out the unloading auger without having to unload the grain tank. This system greatly reduces the wear and tear on unloading auger swing components. It is simple to install and operated with a foot switch in the cab, leaving your hands free to operate the combine.

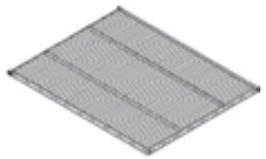
Adjustable Chaffers & Sieves



The galvanized steel adjustable chaffers and sieves replace the top and bottom units. The short finger is designed for cereal and fine seed crops and the long finger is used in large seed crops such as corn and beans.

Adjustable chaffers and sieves feature nylon adjustment mechanisms and cushions in each wire hole to improve adjustments and to reduce friction, wear and breakage. A spring loaded indexed lever allows smooth adjustment, and makes it easy to return to the same settings. Individual replacement louvres make repairs easy.

Replacement Straw Choppers (STS)

Replace worn or damaged straw chopper with new unit features:

- Reversible blades on rotor increase wear.
- Paddle blades on outside for wind creation.
- Uses less power, less fuel than OEM straw chopper.
- All new, not rebuilt units.
- Quick release stationary knives for corn harvesting.
- 39 stationary blades with lighter 1.26″ knife sparing for 3-4″ residue size.

All units are priced without the deflector. The OEM deflector will fit on these choppers or a new one can be purchased.

Unload Auger Shut-Off Kits

The Lankota unloading auger clutch system is an electromagnetic clutch system, allowing the combine operator to empty out the unloading auger without having to unload the grain tank. This system greatly reduces the wear and tear on unloading auger swing components. It is simple to install and operated with a foot switch in the cab, leaving your hands free to operate the combine.

Down Corn Reel By Kelderman

Kelderman corn reels are fully adjustable (up & down, fore & aft) and has mounting brackets available for most brands. The hydraulic drive simplifies the system and allows you the ability to vary the speed of the reel. Our corn reel spokes featuring an exclusive, contoured design are self-cleaning and prevent the reel from interfering with standing corn. Kits will include reel, all mounting hardware, the hydraulic motor kit and the finger extension kit.

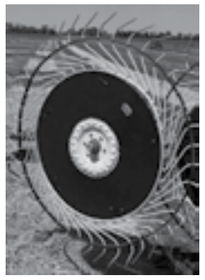
Hay Rake Wheel Windguards



- The Windguard prevents wrapping in windy conditions.
- Windguards are thin, black poly discs used on rake wheels to prevent hay, grass, sudangrass, sorghum, corn stalks, alfalfa, and forage from wrapping around the rake wheel when operating in windy conditions.
- Increases productivity and minimizes raking losses.
- Heavy duty cable ties provide quick, secure attachment

Hay Rake Silencer

- This silencer is a one-piece plastic band that slips over rake wheel teeth to prevent tooth damage.
- Improves rake wheel aggressiveness.
- Helps eliminate skipped over forage.
- Requires less wheel down pressure during operation, resulting in less dirt in the windrow.
- The rake wheels are completely silent when running. No more rattling!
- Quick & easy installation.

Original Equipment Sizes & Specifications: The confidence shown in workmanship and efforts to maintain exact two-or-three-ply, cut-to-length product dimensions and standards for every model. As a result, our belts meet the demands of today's high-density balers.

Original Equipment Materials Used For Baler Belt: Unique fabrics and compounds provide excellent bale start-up while withstanding highly abrasive conditions. Both are critical to reducing maintenance and costly downtime. Unsurpassed quality keeps you in the field during the critical haying season. Each belt is hand-inspected to assure compliance with strict quality standards.

Most Reliable Construction: What makes baler belts durable also makes them reliable. Impregnated rubber patterns, vulcanized rubber-coated fabrics, and materials that won't stretch, shrink, rot, or mildew.

GOLD Guards

Worth their weight in field! Out in the field you need hard nosed, plug resistant guards that get the job done. Gold Guard's exclusive full point/mini point design actually doubles the number of cutting surfaces for twice the cutting action of every sickle stroke. They also reduce plant side movement in half – keeping shelling and shatter loss to an absolute minimum.
